

## COMMUNITY INVOLVEMENT

The Board of Education recognizes that the public has resources of training and experience useful to schools. The strength of the district is in large measure determined by the degree to which these assets are tapped in supporting the improvement of the local educational program.

The Board welcomes and seeks considered views on school district matters from residents and from local community groups and organizations.

The interests and concerns of residents, study committees, and local community groups may be conveyed in writing to the Board, and the Board shall attempt, to the extent that it is reasonable and possible, to react and respond to such expressed interests and concerns.

Adoption date: May 1, 1992
